[2017-New-VersionInstant Download Braindump2go E20-593 VCE and E20-593 PDF 521Q[1-10

 2017 Oct. New EMC E20-593 Exam Dumps with PDF and VCE Free Released Today! Following are some new E20-593 Questions: 1.|2017 New E20-593 Exam Dumps (PDF & VCE) 521Q&As Download:https://www.braindump2go.com/e20-593.html 2.|2017 New E20-593 Exam Questions & Answers Download: https://drive.google.com/drive/folders/0B75b5xYLjSSNUXlhUktJN1RnSmM?usp=sharing   QUESTION 11What happens when an EMC NetWorker file type device becomes full while backups are running? A.   Backups are paused; the oldest save sets are staged. B.   Backups span to another volume.C.   Backups fail; simultaneous restore jobs continue.D.   Backups are paused; aborted and expired save sets are deleted. Answer: B QUESTION 12Your customer needs to back up a Windows file server containing millions of small files to their EMC Disk Library using EMC NetWorker. They have a very limited backup window for this client and need to limit the impact on the server. What is the best way to fulfill the customer's requirements? A.   Implement SnapImage.B.   Increase client parallelism.C.   Enable client-side compression.D.   Utilize NetWorker's cloning and staging capabilities. Answer: A QUESTION 13An EMC NetWorker administrator configures an advanced file type device, setting the device target sessions to two, and max sessions to four. How is data written to the advanced file type device? A.   Each save set is written to a separate file.B.   Each file written by the storage node contains up to four save sets.C.   Four backup jobs will be multiplexed for every two files written to the device.D.   Two save sets will be stored in each file. Answer: A QUESTION 14Your task is to develop a backup-to-disk solution for your client. After an initial analysis, you decide to include one EMC Disk Library (EDL) to be used as the primary backup device. The customer has been using a physical library with LTO-3 drives for many years and would like to have the capability to recover from the old tape. The solution must result in the fewest possible changes to the EMC NetWorker server.How can you best address these requirements? A.   Connect the existing library to the back end of the EDL. Create a virtual library and drives that match the physical drive types.B.   Install the IP replication agent on the backup server that controls the physical library. Copy physical tapes over the network to virtual tapes to the EDL.C.   Migrate all data from the outdated media to the new media format and archive.D.   Create a new data zone offsite to be used for recovery purposes only. Connect the physical library to the new zone and make it available to both locations. Answer: A QUESTION 15Client A performs backups to Storage Node S where the backup operations are managed by EMC NetWorker Server N. NetWorker Management Console is running on Server Y. Client A's configuration information was lost.To which component must the client configuration data be restored? A.   Storage nodeB.   NetWorker Management Console serverC.   ClientD.   NetWorker server Answer: D QUESTION 16What command was used to see the following NDMP device?scsidev@1.6.0:ADIC Scalar i2000 100A|Autochanger (Jukebox), /dev/mc_d6l0S/N: 02TOK00200ATNN=ADIC Scalar i2000 02TOK00200Virtual devicescsidev@255.255.255:IBM ULTRIUM-TD4 7BG2|Tape, /dev/mt_d0l0S/N: 1310056061ATNN=IBM ULTRIUM-TD4 1310056061 WWNN=500104F000A11D3FWWPN=500104F000A11D40 A.   inquireB.   scannerC.   diskscanD.   changers Answer: A QUESTION 17You are deleting save sets manually from the EMC NetWorker server using CLI commands. You receive an error that the database update has failed.What process should you verify is running on the NetWorker server? A.   nsrlcpdB.   nsrmmdbd C.   nsrmmdD.   mminfo Answer: B QUESTION 18What is a characteristic of EMC NetWorker's Open Tape Format (OTF)? A.   Allows multiplexed, heterogeneous data to reside on the same mediaB.   Controls the number of save streams a client backs up simultaneouslyC.   Collects information for pools and index entries to allow data segregationD.   Identifies the ports used by NetWorker to allow data to be saved through a firewall Answer: A QUESTION 19What is the primary function of the EMC NetWorker job daemon? A.   Coordinates scheduled backups, and manages the resulting information and statisticsB.   Generates requests for volume mounting and unmounting when required C.   Identifies NetWorker hosts and their file systemsD.   Identifies application modules and assigns the correct job to the backup API Answer: A QUESTION 20A customer is running an EMC NetWorker 7.6 server on a UNIX platform and wants to monitor backup operations from the command line.Which utility can be used? A.   nsrinfoB.   nsrmmdC.   nsrjbD.   nsrwatch Answer: D !!!RECOMMEND!!! 1.|2017 New E20-593 Exam Dumps (PDF & VCE) 521Q&As Download:https://www.braindump2go.com/e20-593.html 2.|2017 New E20-593 Study Guide Video: YouTube Video: YouTube.com/watch?v=bdnUwUK1-s4
