**Question: 57** You are developing an Azure Durable Function instance. You need to add a delay by using a durable timer. What type of function should you use?  
A.Orchestrator  
B.web hook  
C.Client  
D.Activity  
**Answer: D** **Question: 58** DRAG DROPS You are developing an application that consists of an ASP.NET Core Web API website and a WebJob that starts automatically and runs continuously. You are building the deployment process for the application. You need to ensure that both the website and the WebJob are deployed. How should you structure the deployment folders? To answer, drag the appropriate path segments to the correct locations. Each path segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
**NOTE:** Each correct selection is worth one point.  
**Answer: Question: 59** HOTSPOT You have a cloud solution that uses an Azure Functions consumption plan to scale hundreds of processes. A portion of the code is shown below. (Line numbers are included for reference only.) For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
**NOTE:** Each correct selection is worth one point.  
**Answer: Question: 60** DRAG DROPS You are creating a collaborative image hosting platform as an ASP.NET MVC web application. Users add, update, and modify images on the platform. Images are stored in Azure Blob storage. More than one user at a time must be able to modify the same image. You need to implement optimistic concurrency for uploading images. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.  
**Answer: Question: 61** HOTSPOT You have an Azure subscription named Subscription1. Subscription1 contains the resources in the following table: VNet1 is in RG1. VNet2 is in RG2. There is no connectivity between VNet1 and VNet2. An administrator named Admin1 creates an Azure virtual machine VM1 in RG1. VM1 uses a disk named Disk1 and connects to VNet1. Admin1 then installs a custom application in VM1. You need to move the custom application to VNet2. The solution must minimize administrative effort. Which two actions should you perform? To answer, select the appropriate options in the answer area.  
**NOTE:** Each correct selection is worth one point.  
**Answer: Question: 62** You have an Azure subscription named Subscription1 that is used by several departments at your company. Subscription1 contains the resources in the following table. Another administrator deploys a virtual machine named VM1 and an Azure Storage account named Storage2 by using a single Azure Resource Manager template. You need to view the template used for the deployment. From which blade can you view the template that was used for the deployment?  
A.Contained  
B.VM1  
C.Storage2  
D.RG1  
**Answer: D** **Question: 63** You have two subscriptions named Subscription1 and Subscription2. Each subscription is associated to a different Azure AD tenant. Subscription1 contains a virtual network named VNet1. VNet1 contains an Azure virtual machine named VM1 and has an IP address space of 10.0.0.0/16. Subscription2 contains a virtual network named VNet2. VNet2 contains an Azure virtual machine named VM2 and has an IP address space of 10.10.0.0/24. You need to connect VNet1 to VNet2. What should you do first?  
A.Modify the IP address space of VNet2.  
B.Move VM1 to Subscription1.  
C.Provision virtual network gateways.  
D.Move VNet1 to Subscription2.  
**Answer: C** **Question: 64** You have an Azure Active Directory (Azure AD) tenant. You have an existing Azure AD conditional access policy named Policy1. Policy1 enforces the use of Azure AD-joined devices when members of the Global Administrators group authenticate to Azure AD from untrusted locations. You need to ensure that members of the Global Administrators group will also be forced to use multi-factor authentication when authenticating from untrusted locations. What should you do?  
A.From the Azure portal, modify session control of Policy1.  
B.From multi-factor authentication page, modify the user settings.  
C.From multi-factor authentication page, modify the service settings.  
D.From the Azure portal, modify grant control of Policy1.  
**Answer: D** **Question: 65** HOTSPOT You plan to deploy five virtual machines to a virtual network subnet. Each virtual machine will have a public IP address and a private IP address. Each virtual machine requires the same inbound and outbound security rules. What is the minimum number of network interfaces and network security groups that you require? To answer, select the appropriate options in the answer area.  
**NOTE:** Each correct selection is worth one point.  
**Answer: Question: 66** You have an Azure subscription named Subscription1 that contains an Azure virtual machine named VM1. VM1 is in a resource group named RG1. VM1 runs services that will be used to deploy resources to RG1. You need to ensure that a service running on VM1 can manage the resources in RG1 by using the identity of VM1. What should you do first?  
A.From the Azure portal, modify the Access control (IAM) settings of RG1.  
B.From the Azure portal, modify the Policies settings of RG1.  
C.From the Azure portal, modify the Access control (IAM) settings of VM1.  
D.From the Azure portal, modify the value of the Managed Service Identity option for VM1.  
**Answer:**

D Explanation: References:<https://docs.microsoft.com/en-us/azure/active-directory/managed-identities-azure-resources/overview> Question: 67 HOTSPOT You have an Azure subscription named Subscription1. Subscription1 contains the virtual networks in the following table: Subscription1 contains the virtual machines in the following table: The firewalls on all the virtual machines are configured to allow all ICMP traffic. You add the peerings in the following table: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point. Answer: Explanation: References:<https://docs.microsoft.com/en-us/azure/virtual-network/tutorial-connect-virtual-networks-portal> !!!RECOMMEND!!! 1. |2019 Latest AZ-300 Exam Dumps (PDF & VCE) 115Q&As
