This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than once correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a SharePoint Server farm. You create an external content type named ECT1 for a Microsoft SQL Server database. You implement cloud hybrid search. You create a Line of Business Data content source and run a full crawl.

Users in SharePoint Online report that the search results do not contain any data from ECT1. You need to ensure that searches can return data from ECT1. Solution: From a Business Data Connectivity Service application, you grant the Default content access account Manage permissions to ECT1. Does this meet the goal? A. Yes B. No Answer: A

QUESTION 15Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than once correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a SharePoint Server farm. You create an external content type named ECT1 for a Microsoft SQL Server database.

You implement cloud hybrid search. You create a Line of Business Data content source and run a full crawl. Users in SharePoint Online report that the search results do not contain any data from ECT1. You need to ensure that searches can return data from ECT1. Solution: You grant the Default content access account Read permissions to the Central Administration web application. Does this meet the goal? A. Yes B. No Answer: B

QUESTION 16Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than once correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a SharePoint Server farm.

A user attempts to create a site column named RequestType that uses a managed metadata term set named RequestTypes as metadata. The user reports that Allow 'Fill-in' choices are set to No, and the option cannot be configured. You need to ensure that the user can set Allow 'Fill-in' choices to Yes. Solution: You set the term set Submission Policy to Open. Does this meet the goal? A. Yes B. No Answer: B

QUESTION 17Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than once correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a SharePoint Server farm. A user attempts to create a site column named RequestType that uses a managed metadata term set named RequestTypes as metadata. The user reports that Allow 'Fill-in' choices are set to No, and the option cannot be configured. You need to ensure that the user can set Allow 'Fill-in' choices to Yes. Solution: You add the user as a term set stakeholder. Does this meet the goal? A. Yes B. No Answer: B

QUESTION 18Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than once correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a SharePoint Server farm. A user attempts to create a site column named RequestType that uses a managed metadata term set named RequestTypes as metadata. The user reports that Allow 'Fill-in' choices are set to No, and the option cannot be configured. You need to ensure that the user can set Allow 'Fill-in' choices to Yes. Solution: You add the user as a term set Group Manager. Does this meet the goal? A. Yes B. No Answer: A
