Dec/2018 Braindump2go 1Y0-230 Exam Dumps with PDF and VCE New Updated Today! Following are some new 1Y0-230 Real Exam Questions:]1.|2018 Latest 1Y0-230 Exam Dumps (VCE & PDF) 122Q&As Download: https://www.braindump2go.com/1y0-230.html2.|2018 Latest 1Y0-230 Exam Questions & Answers Download: https://drive.google.com/drive/folders/0B75b5xYLjSSNR0hqNjNvYUlzeE0?usp=sharingQUESTION 79Scenario: A Citrix Administrator deployed a NetScaler in one-arm mode. Currently, the VLANs 20, 30 and 40 are tagged on the interface with the option of `tagall' on the interface. What is true regarding the VLANs, when `tagall' is enabled on the interface?A.   VLANS 1, 20, 30, 40 and HA packets are tagged on the interfaceB.   VLANS 20, 30 and 40 are tagged on the interfaceC.   VLANS 20, 30, 40 and HA packets are tagged on the interfaceD.   VLANS 1, 20, 30 and 40 are tagged on the interfaceAnswer: DExplanation: https://support.citrix.com/article/CTX115575QUESTION 80Which NetScaler mode is commonly referred to as `inline mode'?A.   One-Arm ModeB.   Use Source IP (USIP)C.   MAC-based ForwardingD.   Two-Arm ModeAnswer: DExplanation:In an inline mode (also called two-arm mode) setup, you connect the NetScaler appliance to the network through multiple VLANs. https://docs.citrix.com/zh-cn/netscaler/11/traffic-management/load-balancing/load-balancing-inlinemode.htmlQUESTION 81 A NetScaler with Unified Gateway combines _____ and _____ to provide access to websites and applications through a single URL. (Choose the correct option to complete the sentence.)A.   NetScaler Gateway; Load BalancingB.   Content Switching; Authentication featuresC.   Content Switching; NetScaler GatewayD.   Authentication features; Load BalancingAnswer: B Explanation:NetScaler Unified Gateway leverages its Authentication, Authorization and Auditing (AAA) features with content switching to enable users to access all their authorized enterprise applications through a single gateway and URL.QUESTION 82 Which three steps can a Citrix Administrator take to integrate an existing CERT-based authentication policy on an existing NetScaler Gateway platform? (Choose three.)A.   Create a CERT authentication policy and bind it to the NetScaler Gateway virtual serverB.   Enable client authentication on the SSL parameters of the virtual serverC.   Bind the existing CERT authentication policy to the NetScaler Gateway virtual serverD.   Enable the two-factor option on the existing CERT authentication profileE.   Change the client certificate to Mandatory on the SSL parameters of the virtual server**Answer: BCE**QUESTION 83Scenario: IT administrators working from remote locations, need to connect securely to internal Windows servers to manage the servers.Below are the connection requirements:- The remote client devices must be locked down, preventing installation of any additional software- Users must authenticate at NetScaler Gateway and NetScaler Gateway must perform Single Sign-on to the Windows servers- Connection capabilities (for example, client drive mapping) must be controlled by NetScaler GatewayWhich connection method can a Citrix Administrator configure to meet these requirements?A.   RDP ProxyB.   Clientless VPNC.   Full VPND.   Micro VPNAnswer: AExplanation:**https://docs.citrix.com/en-us/netscaler-gateway/12/rdp-proxy.html**QUESTION 84Scenario: A Citrix Administrator has a NetScaler SDX with four VPX instances configured. The SDX has a 10GB bandwidth license that has been configured with dedicated bandwidth of 2 GB for each instance. However, the administrator found that three instances do NOT ever reach the bandwidth limit, while one instance reaches the limit and needs 1 GB more bandwidth to accommodate increased traffic requests. What can the administrator change on the instance that requires more bandwidth, to meet traffic requirements?A. Configure LA channel to increase the bandwidthB.   Configure burst capacity of 1 GB with priority 10C.   Purchase a SDX license to increase the bandwidth on the instancesD.   Configure burst capacity on the instance adding 1 GB of bandwidth with burst priority 0Answer: DExplanation:**https://docs.citrix.com/en-us/sdx/10-5/sdx-ag-prov-ns-instance-metering.html**QUESTION 85 Which three Unified Gateway elements can be configured by the Unified Gateway Wizard? (Choose three.)A.   Responder policy for HTTP to HTTPS redirectB.   A primary and any optional secondary authentication configurationC.   The Unified Gateway primary virtual serverD.   Rewrite policy for HTTP to HTTPS redirectE.   An SSL Server Certificate for the Unified Gateway virtual serverAnswer: BCEExplanation:**https://docs.citrix.com/en-us/netscaler-gateway/12/unified-gateway.html**QUESTION 86 Scenario: A Citrix Administrator created four session policies and applied them to the bind points below.- Policy A: Split tunnel ON priority 10 bound at the Virtual Server level- Policy B: Split tunnel OFF priority 20 bound at the Group level- Policy C: Split tunnel NOT configured priority 30 bound at the Global level- Policy D: Split tunnel ON priority 6 bound at the Group levelWhich policy will take precedence?A.   Policy CB.   Policy DC.   Policy AD.   Policy BAnswer: AExplanation: **https://support.citrix.com/article/CTX214588**QUESTION 87What are two pre-requisites for configuring SmartAccess policies on a NetScaler Gateway virtual server? (Choose two.)A.   Universal LicenseB.   Pre- or Post-Endpoint Analysis configuration policyC.   Smart card configuration policyD.   Standard LicenseAnswer: ABExplanation:Make sure the Prerequisites are completed. This includes: ICA Only unchecked, Gateway Universal licenses installed, Callback URL configured at StoreFront, and Trust XML enabled on Delivery Controllers.If you are using a Preauthentication Policy to run an Endpoint Analysis scan:

https://www.carlstalhood.com/smartaccess-smartcontrol-netscaler-gateway-12/QUESTION 88Scenario: A company has three departments with proprietary applications that need to be load-balanced on the NetScaler. The three department managers would like to use the same IP address to access their individual application, which would mean configuring three load-balanced virtual servers all using the same IP address.How can a Citrix Administrator configure this on the NetScaler?A.   Configure three different lad-balanced virtual servers with three different IP addresses on the NetScalerB.   Configure three SNIPs with the same IP address on the NetScalerC.   Configure three different NetScalers that use the same IP addressD.   Configure three different admin partitions that allow the use of the same IP address for each load- balanced virtual server**Answer: D**QUESTION 89Which three pieces of information are required for a NetScaler Unified Gateway deployment? (Choose three.)A.   Valid SSL CertificatesB.   Secondary Authentication for the Unified GatewayC.   Enterprise license or higherD.   Content Switching virtual serverE.   Multiple IP addresses for User Access**Answer: ACD**!!!RECOMMEND!!!1.|2018 Latest 1Y0-230 Exam Dumps (VCE & PDF) 122Q&As Download:**https://www.braindump2go.com/1y0-230.html2.|2018 Latest 1Y0-230 Study Guide Video:** YouTube Video: YouTube.com/watch?v=i4gqaJ1okMU
