Reference:https://docs.microsoft.com/en-us/azure/security-center/security-center-introductionQUESTION 54Your company has just setup an Azure subscription. They have the following requirements- Be able to deploy a set of resources, resource groups, role assignments to a set of subscriptions.- Be able to ensure no one can delete resources defined in a resource group named lead2pass-staging- Ensure that all Windows Servers defined as Azure virtual machines should have the Microsoft IaaS Antimalware extension installedWhich of the following can be used for the following requirement?- Be able to ensure no one can delete resources defined in a resource group named lead2pass-rgA. Azure PolicyB. Azure BlueprintsC. Azure AD Identity ProtectionD. Azure Resource locksAnswer: DExplanation:
https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/lock-resourcesQUESTION 55You are considering the use of sensitivity labels in Microsoft 365. Can sensitivity labels can be used to encrypt the contents in documents?A. YesB. NoAnswer: AExplanation:When you apply a ?Confidential? label to a document, the label will encrypt the content in the document. Reference:https://docs.microsoft.com/en-us/microsoft-365/compliance/sensitivity-labels?view=o365-worldwideQUESTION 56You are planning on making use of the Azure Bastion service. Can you use the Azure Bastion service to restrict traffic from the Internet onto an Azure virtual machine?A. YesB. NoAnswer: AExplanation:You cannot use the Azure Bastion service to restrict traffic into an Azure virtual machine. For this you will need to use Network Security groups. The Azure Bastion service is used to

RDP/SSH into an Azure virtual machine via the Azure portal and the browser.Reference: https://docs.microsoft.com/en-us/azure/bastion/bastion-overviewQUESTION 57You are looking at the capabilities of Azure Active Directory. Can you use Azure Active Directory to manage device registrations in Azure Active Directory?A. YesB. NoAnswer: AExplanation:https://docs.microsoft.com/en-us/azure/active-directory/devices/overviewQUESTION 58Your company is planning on using Azure Cloud services. Which of the following can be used to ensure that data can be read only by authorized users?A. EncryptionB. DeduplicationC. ArchivingD. CompressionAnswer: AExplanation:You can ensure data is encrypted. Then only authorized users would have the encryption key. The encryption key can then be used to decrypt and read the data.Reference: https://docs.microsoft.com/en-us/microsoft-365/compliance/office-365-encryption-in-the-microsoft-cloud-overview?view=o365-worldwideQUESTION 59Your company is planning on using Azure Active Directory for the storage of identities. They want to make use of the self-service password reset feature.Which of the following authentication methods are available for self-service password reset? Choose 3 answers from the options given belowA. EmailB. A passport identification numberC. A picture messageD. Mobile app notificationE. Mobile app codeAnswer: ADEExplanation:Below are the authentication methods available for self-service password reset: Mobile app notification Mobile app code Email Mobile phone Office phone Security questions Reference:https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-howitworksQUESTION 60Your company wants to start making use of Azure. They are looking at different security aspects when it comes to using Azure. Which of the following could be used for the following requirement?- Enforce Multi-Factor authentication based on the sign-in riskA. Azure AD Identity ManagementB. Azure Conditional AccessC. Azure AD RolesD. Azure AD ConnectAnswer: AExplanation:In Azure AD Identity Protection, you can configure the Sign-in risk policy to allow access and enforce the use of Multi-Factor Authentication.

Reference:https://docs.microsoft.com/en-us/azure/security-center/azure-defenderQUESTION 63Which of the following is available for the Azure Application Gateway service that helps to protect web applications from common exploits and vulnerabilities?A. Azure FirewallB. Azure Web Application FirewallC. Azure PolicyD. Azure Identity ProtectionAnswer: BExplanation:The Azure Web Application Firewall can be used along with the Azure Application Gateway resource to protect web applications from common exploits and vulnerabilities. It can help to protect against attacks such as SQL injection attacks or cross-site scripting attacks.Reference:https://docs.microsoft.com/en-us/azure/web-application-firewall/ag/ag-overviewQUESTION 64You are evaluating the different services available in Azure when it comes to security. Which of the following can be accomplished with the use of the Azure Privileged Identity Managed service?A. Filter traffic to Azure virtual machinesB. Enable Multi-Factor Authentication for users based on detected sign-in risksC. Provide just-in-time access to resource roles in AzureD. Measure the security posture of resources defined in an Azure environmentAnswer: CExplanation:With Azure Privileged Identity Managed , you can provide just-in-time access to Azure AD roles and resource roles. Here users can request for access whenever required. And the access can be granted or denied accordingly.Reference:
https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configureQUESTION 65You are evaluating the different discovery tools that are available with Microsoft 365. You need to map the tool that can be used for desired requirement below:- Be able to quickly find email in Exchange mailboxesWhich of the following would you use for this requirement?A. Core eDiscoveryB. Advanced eDiscoveryC. Sensitivity labelsD. Content searchAnswer: DExplanation:The Content search tool can be used to quickly find email in Exchange mailboxes, documents in SharePoint sites and OneDrive locations.Reference:https://docs.microsoft.com/en-us/microsoft-365/compliance/search-for-content?view=o365-worldwide
QUESTION 66You are evaluating the different discovery tools that are available with Microsoft 365. You need to map the tool that can be used for desired requirement below:- Provide basic capabilities on searching and exporting of content in Microsoft 365Which of the following would you use for this requirement?A. Core eDiscoveryB. Privileged Access ManagementC. Sensitivity labels D. Content searchAnswer: AExplanation:The Core eDiscovery tool helps you to find and export content in Microsoft 365 and Office 365. You can also use the tool to place an eDiscovery hold on certain content locations.Reference:
https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-core-ediscovery?view=o365-worldwideQUESTION 67In the Microsoft Cloud Adoption Framework for Azure, which two phases are addressed before the Ready phase? Each correct answer presents a complete solution.NOTE: Each correct selection is worth one point.A. PlanB. ManageC. AdoptD. GovernE. Define StrategyAnswer: AEExplanation:https://docs.microsoft.com/en-us/azure/cloud-adoption-framework/overviewQUESTION 68 What is an example of encryption at rest?A. encrypting communications by using a site-to-site VPNB. encrypting a virtual machine diskC. accessing a website by using an encrypted HTTPS connectionD. sending an encrypted emailAnswer: B Explanation:https://docs.microsoft.com/en-us/azure/security/fundamentals/encryption-atrestQUESTION 69Which Microsoft 365 feature can you use to restrict communication and the sharing of information between members of two departments at your organization?A. sensitivity label policiesB. Customer LockboxC. information batteriesD. Privileged Access Management (PAM)Answer: CExplanation:https://docs.microsoft.com/en-us/microsoft-365/compliance/information-barriersQUESTION 70 Which three authentication methods does Windows Hello for Business support? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.A. fingerprintB. facial recognitionC. PIND. email verificationE. security questionAnswer: ABCExplanation:
https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-how-it-works-authentication
QUESTION 71What feature in Microsoft Defender for Endpoint provides the first line of defense against cyberthreats by reducing the attack surface?A. automated remediationB. automated investigationC. advanced huntingD. network protectionAnswer: D Explanation:Network protection helps protect devices from Internet-based events. Network protection is an attack surface reduction capability.Reference:
https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/network-protection?view=o365-worldwideQUESTION 72Which two types of resources can be protected by using Azure Firewall? Each correct answer presents a complete solution.NOTE: Each correct selection is worth one point.A. Azure virtual machinesB. Azure Active Directory (Azure AD) usersC. Microsoft Exchange Online inboxesD. Azure virtual networksE. Microsoft SharePoint Online sitesAnswer: DEQUESTION 73You plan to implement a security strategy and place multiple layers of defense throughout a network infrastructure.Which security methodology does this represent?A. threat modelingB. identity as the security perimeterC. defense in depthD. the shared responsibility modelAnswer: CExplanation:
https://docs.microsoft.com/en-us/learn/modules/secure-network-connectivity-azure/2-what-is-defense-in-depthQUESTION 74What can you use to scan email attachments and forward the attachments to recipients only if the attachments are free from malware?A.

Microsoft Defender for Office 365B. Microsoft Defender AntivirusC. Microsoft Defender for IdentityD. Microsoft Defender for EndpointAnswer: AExplanation:
https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-advanced-threat-protection-service-description
QUESTION 75Which feature provides the extended detection and response (XDR) capability of Azure Sentinel?A. integration with the Microsoft 365 compliance centerB. support for threat huntingC. integration with Microsoft 365 DefenderD. support for Azure Monitor WorkbooksAnswer: CExplanation:
https://docs.microsoft.com/en-us/microsoft-365/security/defender/eval-overview?view=o365-worldwideQUESTION 76What can you use to provide threat detection for Azure SQL Managed Instance?A. Microsoft Secure ScoreB. application security groupsC. Azure DefenderD. Azure BastionAnswer: CQUESTION 77Which Azure Active Directory (Azure AD) feature can you use to restrict Microsoft Intune-managed devices from accessing corporate resources?A. network security groups (NSGs)B. Azure AD Privileged Identity Management (PIM)C. conditional access policiesD. resource locksAnswer: CQUESTION 78Which Microsoft 365 feature can you use to restrict users from sending email messages that contain lists of customers and their associated credit card numbers?A. retention policiesB. data loss prevention (DLP) policiesC. conditional access policiesD. information barriersAnswer: BExplanation:
https://docs.microsoft.com/en-us/microsoft-365/compliance/dlp-learn-about-dlp?view=o365-worldwideQUESTION 79In a Core eDiscovery workflow, what should you do before you can search for content?A. Create an eDiscovery hold.B. Run Express Analysis.C. Configure attorney-client privilege detection.D. Export and download results.Answer: AExplanation:
https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-core-ediscovery?view=o365-worldwideQUESTION 80 Which Microsoft portal provides information about how Microsoft manages privacy, compliance, and security?A. Microsoft Service Trust PortalB. Compliance ManagerC. Microsoft 365 compliance centerD. Microsoft SupportAnswer: AExplanation:
https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust-portal?view=o365-worldwideQUESTION 81What can you protect by using the information protection solution in the Microsoft 365 compliance center?A. computers from zero-day exploitsB. users from phishing attemptsC. files from malware and virusesD. sensitive data from being exposed to unauthorized usersAnswer: DExplanation:
https://docs.microsoft.com/en-us/microsoft-365/compliance/information-protection?view=o365-worldwideQUESTION 82What can you specify in Microsoft 365 sensitivity labels?A. how long files must be preservedB. when to archive an email messageC. which watermark to add to filesD. where to store filesAnswer: CExplanation:
