2018 May New CompTIA CAS-003 Exam Dumps with PDF and VCE Just Updated Today! Following are some new CAS-003 Real Exam Questions:1.|2018 Latest CAS-003 Exam Dumps (PDF & VCE) 270Q Download:https://www.braindump2go.com/cas-003.html2.|2018 Latest CAS-003 Exam Questions & Answers Download:https://drive.google.com/drive/folders/11eVcvdRTGUBlESzBX9a6YlPUYiZ4xoHE?usp=sharing QUESTION 12A hospital's security team recently determined its network was breached and patient data was accessed by an external entity. The Chief Information Security Officer (CISO) of the hospital approaches the executive management team with this information, reports the vulnerability that led to the breach has already been remediated, and explains the team is continuing to follow the appropriate incident response plan. The executive team is concerned about the hospital's brand reputation and asks the CISO when the incident should be disclosed to the affected patients. Which of the following is the MOST appropriate response?A. When it is mandated by their legal and regulatory requirementsB. As soon as possible in the interest of the patientsC. As soon as the public relations department is ready to be interviewedD. When all steps related to the incident response plan are completedE. Upon the approval of the Chief Executive Officer (CEO) to release information to the publicAnswer: AQUESTION 13A penetration tester is conducting an assessment on Comptia.org and runs the following command from a coffee shop while connected to the public Internet: Which of the following should the penetration tester conclude about the command output?A. The public/private views on the Comptia.org DNS servers are misconfiguredB. Comptia.org is running an older mail server, which may be vulnerable to exploitsC. The DNS SPF records have not been updated for Comptia.orgD. 192.168.102.67 is a backup mail server that may be more vulnerable to attackAnswer: BQUESTION 14An organization has employed the services of an auditing firm to perform a gap assessment in preparation for an upcoming audit. As part of the gap assessment, the auditor supporting the assessment recommends the organization engage with other industry partners to share information about emerging attacks to organizations in the industry in which the organization functions. Which of the following types of information could be drawn from such participation?A. Threat modelingB. Risk assessmentC. Vulnerability dataD. Threat intelligenceE. Risk metricsF. Exploit frameworksAnswer: FQUESTION 15A business is growing and starting to branch out into other locations. In anticipation of opening an office in a different country, the Chief Information Security Officer (CISO) and legal team agree they need to meet the following criteria regarding data to open the new office: Store taxation-related documents for five years Store customer addresses in an encrypted format Destroy customer information after one year Keep data only in the customer's home countryWhich of the following should the CISO implement to BEST meet these requirements? (Choose three.)A. Capacity planning policyB. Data retention policyC. Data classification standardD. Legal compliance policyE. Data sovereignty policyF. Backup policyG. Acceptable use policy H. Encryption standardAnswer: BCHQUESTION 16An engineer is evaluating the control profile to assign to a system containing PII, financial, and proprietary data. Based on the data classification table above, which of the following BEST describes the overall classification?A. High confidentiality, high availabilityB. High confidentiality, medium availabilityC. Low availability, low confidentialityD. High integrity, low availabilityAnswer: BQUESTION 17An engineer is assisting with the design of a new virtualized environment that will house critical company services and reduce the datacenter's physical footprint. The company has expressed concern about the integrity of operating systems and wants to ensure a vulnerability exploited in one datacenter segment would not lead to the compromise of all others. Which of the following design objectives should the engineer complete to BEST mitigate the company's concerns? (Choose two.)A. Deploy virtual desktop infrastructure with an OOB management networkB. Employ the use of vTPM with boot attestationC. Leverage separate physical hardware for sensitive services and dataD. Use a community CSP with independently managed security servicesE. Deploy to a private cloud with hosted hypervisors on each physical machineAnswer: ACQUESTION 18The code snippet below controls all electronic door locks to a secure facility in which the doors should only fail open in an emergency. In the code, "criticalValue" indicates if an emergency is underway: Which of the following is the BEST course of action for a security analyst to recommend to the software developer?A. Rewrite the software to implement fine-grained, conditions-based testingB. Add additional exception handling logic to the main program to prevent doors from being openedC. Apply for a life-safety-based risk exception allowing secure doors to fail openD. Rewrite the software's exception handling routine to fail in a secure stateAnswer: BQUESTION 19A security controls assessor intends to perform a holistic configuration compliance test of networked assets. The assessor has been handed a package of definitions provided in XML format, and many of the files have two common tags within them: "<object object_ref=... />" and "<state state_ref=... />". Which of the following tools BEST supports the use of these definitions?A. HTTP interceptorB. Static code analyzerC. SCAP scannerD. XML fuzzerAnswer: DQUESTION 20Two competing companies experienced similar attacks on their networks from various threat

actors. To improve response times, the companies wish to share some threat intelligence about the sources and methods of attack. Which of the following business documents would be BEST to document this engagement?A. Business partnership agreementB. Memorandum of understandingC. Service-level agreementD. Interconnection security agreementAnswer: DQUESTION 21An engineer maintains a corporate-owned mobility infrastructure, and the organization requires that all web browsing using corporate-owned resources be monitored. Which of the following would allow the organization to meet its requirement? (Choose two.)A. Exempt mobile devices from the requirement, as this will lead to privacy violationsB. Configure the devices to use an always-on IPSec VPNC. Configure all management traffic to be tunneled into the enterprise via TLSD. Implement a VDI solution and deploy supporting client apps to devicesE. Restrict application permissions to establish only HTTPS connections outside of the enterprise boundaryAnswer: BEQUESTION 22A security analyst is reviewing the corporate MDM settings and notices some disabled settings, which consequently permit users to download programs from untrusted developers and manually install them. After some conversations, it is confirmed that these settings were disabled to support the internal development of mobile applications. The security analyst is now recommending that developers and testers have a separate device profile allowing this, and that the rest of the organization's users do not have the ability to manually download and install untrusted applications. Which of the following settings should be toggled to achieve the goal? (Choose two.)A. OTA updatesB. Remote wipingC. Side loadingD. SandboxingE. ContainerizationF. Signed applicationsAnswer: EF!!!RECOMMEND!!!1.|2018 Latest CAS-003 Exam Dumps (PDF & VCE) 270Q Download:https://www.braindump2go.com/cas-003.html2.|2018 Latest CAS-003 Exam Questions & Answers Download: YouTube Video: YouTube.com/watch?v=wiypGN6OqiA
